Medicare-D: Innovation or Illusion?

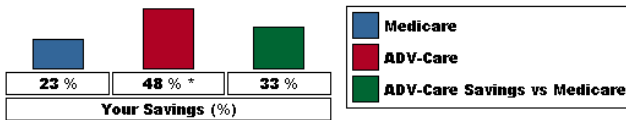

There is no doubt that Medicare-D was a step in the right direction to helping the majority of U.S. citizens that are uninsured and cannot afford either basic or life saving medications. However, the fact of the matter is, Medicare-D is an insurance program and the savings keep reducing year after year. As you have experienced first hand, the premiums keep rising, the deductible increasing and the donut hole continues to widen year after year.

Let us examine a couple of scenarios. For instance if your annual drug expenses are around \$1300, the following graph illustrates how much you are expected to pay using the Medicare-D Plan vs. how much you would save by using ADV-Care Pharmacy.

Your Yearly Spending (\$)

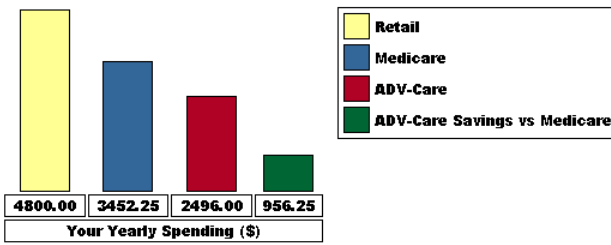

Your Savings (%)

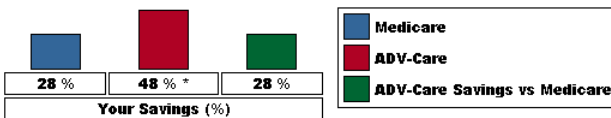

As you can see, instead of spending **\$1,300** annually at retail cost, or **\$1002.25** through Medicare-D, with ADV-Care Pharmacy, you only spend **\$676** a year. That means 33% savings directly on top of Medicare-D.

Let us observe how your saving might be affected if your annual drug costs fall within the "Donut Hole". For example, if your yearly drug costs are **\$4,800**, through Medicare you would pay **\$3,452.25**, but with ADV-Care, your cost would be **\$2,496**. That's a 28% savings compared to Medicare!

Your Yearly Spending (\$)

Your Savings (%)

At **Adv-Care Pharmacy**, our customers best interest, and allowing them to maximize savings is always our premier concern. If you fell in the donut hole this year or you feel you are paying too much for your meds, ADV-Care Pharmacy has a solution to help you get the most savings on your meds for 2009.
